

Mission Statement- Dr. Emanuel Chambers, M.D Candidate for President AFT 2000

Greetings fellow members. I am Dr. Emanuel Chambers, M.D., an adjunct faculty member who has taught for 9 years in the science department at WCCCD. I am running for the office of President of our union-AFT 2000 for the 2019 election. I would like your support and your vote. I served as a steward under the previous union officers that provided me with knowledge, understanding and training to advocate for fellow faculty in a leadership position. I see the 2019 election as the year to promote positive change for all and address many of the concerns that have weighed heavily on the majority of faculty over the past few years, for example -disparity between Part time and Full time faculty at the bargaining table during contract negotiations, lack of hiring of full time faculty from the part time faculty pool, less than marginal pay increases that are distributed to part time faculty, disparity in pay among full time faculty, lack of waivers for part timers who are available verses hiring new part time faculty from the outside to cover additional classes, etc. I need for all the adjunct faculty to take the time and send in your ballots. Previous elections have had less than 20% of the ballots sent in. Make sure the union office has your most recent mailing address and help me, Dr. Emanuel Chambers, M.D. , make history and become the first adjunct president of AFT-2000.
